

Good day,

Skycode will like to thank you for taking the time to do our evaluation test. Below are the details of the project:

Angular or Blazor Chat Project Description:

Candidates are required to develop a Angular or Blazor chat tool which will enable registered users on the Chat tool to communicate via messaging.

Kindly see below image for the proposed chat tool where registered user 'Justice Shange' sent registered user 'Anthony Fritz' a chat message on the 20th august 2021:

Requirement:

1. The first prize is for the above UI/UX to be built as presented. Candidate Innovations are also welcome and all must flow seamlessly and be intuitive that the user does not require a user manual to understand how it works. If this is achieved then the Candidate could stand a chance to be paid R15, 000 for their efforts.
2. However, if the above cannot be fully developed then the candidate has the option to show how far they got and explain their logical thinking behind how they have developed the App
3. The candidate has the freedom to innovate the design of which they will walk us through their thinking when they present it

Duration:

The candidate will inform us on how long they envisage this project will take them.
